

ADM Securities CFD Services

ADM securities provides a fast and effective execution service in the major equity markets. CFD's are available on the exchanges shown on page 2.

As with other derivative products these instrument trade on a margin basis. Initial margin requirements are shown on page 2. This can be made up of acceptable stocks/bonds or cash.

Variation margin will be calculated on a daily basis and will be credited/debited on a daily basis. Any debit on variation margin must be covered by cash on the same day.

In order to open an account you are required to complete the account opening process as described separately. Due to the leverage of these products, we require customers to be classified as experienced or professional customers under the FSA client categorisation rules. We will require proof of this experience.

Should you have any questions with regards to CFD's or indeed any other products we provide, please do not hesitate to contact Steve Hanson on 0207 716 8300 or by email steve.hanson@admisi.com
